EDUCATION

University of the Philippines – Los Baños
Bachelor of Science in Computer Science | Honor Roll
WORK EXPERIENCE

January 2019 - August 2024
GWA: 1.94

Kulay | Remote
Full Stack Developer | Contract

Pasig, Manila
November 2024 – Present

- Worked with a startup development team to build and deploy a **Point-of-Sale (POS) system**, along with a **web-based admin dashboard** for system configuration and management, deployed using **GCP** services and infrastructure.
- Developed the BIR-compliant **reporting module (14 reports)**, which significantly contributed to getting **Point-of-sale approval & certification** from BIR, while also implementing **offline/online mode** operation with **data syncing**.
- Implemented **GrabFood Partner APIs** and implemented **9 webhook listeners** plus **15+ API routes** for grab related services for real-time order syncing and transaction logging, with **multi-tenant support**.
- Integrated **PayMongo APIs** to enable **QRPH** related payments for the POS system, which included signature **validation** for verifying transaction integrity and authenticity.
- Developed **40+** REST APIs in **NestJS** using **TypeORM (PostgreSQL)** and implemented **30+ Point-of-sale** data-access services using **Drizzle** for the pos embedded **SQLite**.

Pro-Serve Corporate Support | Hybrid
Junior Full Stack Developer | Fulltime

Ortigas, Manila
October 2024 – Present

- Developed automation agents and scripts using **Sequentum**, **Selenium**, and **Puppeteer** to scrape structured data across major retailers (Home Depot, Amazon, Lowe's, Acenet, etc), handling volumes ranging from **200 to 100,000+** products.
- Built a **NestJS API** with validation and upsert logic to import **1,000–2,000+** product-sales records per week from various retailers into a MySQL database, eliminating spreadsheet-based data entry and saving **~10 hours/month** in manual labor.
- Automated **retailer report generation** in the **NestJS pipeline**, reducing report time from **~30 minutes to seconds** (**~6×** faster) and enabling **timeframe-based reporting**, fully eliminating **manual report creation**.
- Assisted in integrating **Google and Microsoft OAuth** authentication and **Stripe** for payments in a web-based application, while also debugging issues, implementing fixes, and contributing to new features.
- Assisted in the development of **7 Shopify e-commerce websites**, customizing storefronts with **Liquid** to create customized pages while also implementing forms with validations with app integrations.

LOPhils Incorporated | Remote
Back-end Developer Intern | Fulltime

Quezon City, Manila
July – August 2023

- Collaborated with a development team to build a web-based application deployed using **AWS** services and infrastructure.
- Updated **GraphQL** services and implemented **2FA**, fixing UI and functionality issues to deliver a smoother, more secure, and reliable user experience.

PROJECTS

TrackIt | [Source Code](#)

Next.js | D3.js | Tailwind | Spring Boot

- Built a personal **finance dashboard** featuring **interactive charts**, **CRUD functionality**, and **JWT-based authentication**, deployed on **Vercel** with a **PostgreSQL** database and backend on **Render**.

Clustera | [Source Code](#)

React.js | D3.js | Tailwind | Django | Scikit-Learn | Gensim | Amazon EC2

- Web-based **NLP** application that ingests text data (e.g., Reddit posts), performs **topic modeling**, **clustering**, and **text classification** (83.39% accuracy), and generates visual insights to interpret unstructured content.

Link | [Source Code](#)

React.js | Material-UI | Tailwind | Node.js | Express | MongoDB

- Developed **social media web application** with **JWT-secured CRUD APIs**, hosted on **Vercel** and **MongoDB Atlas**

SKILLS

Languages: JavaScript, TypeScript, Python, Java, Liquid

Libraries/Frameworks: React-Native, Expo, Next.js, Django, Nest.js, D3.js, Express, Tailwind, Spring Boot, GraphQL, Drizzle ORM, Type ORM, Selenium, Puppeteer.

Developer Tools: Git, Docker, AWS, GCP, Postman, Visual Studio, Cursor, Ngrok, Selenium, Jira, Sequentum
